Stargazing from an Observatory (17)

Join me in my Orionis Observatory in Middletown for an evening of enjoying the beauty of the night sky. We'll use my 11 inch telescope (and maybe others) to look at stars, star clusters, galaxies, nebulae, planets (Uranus & Neptune) and even the Moon (the latter if on the rain date). This is a single night event and the date is fixed at Friday Nov 22nd with a rain date of Friday Dec 6th. If the weather does not cooperate on the primary or rain dates, I will discuss the structures of the Moon and Sun inside our home on the rain date.

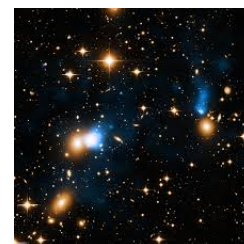

I can accommodate no more than 10 people. Bidding starts @ \$25/person.

Storytelling 101 Class (18)

We all have stories to tell. But sometimes, we do not know where to begin.

This class is designed to facilitate the live, true storytelling process, from beginning to end, starting from nothing and ending up with one performance-ready story. There will be five classes, 2 hours at a time. Each class will focus on a specific step in the process, starting with finding, then crafting, editing, practicing and, finally, performing the story. A performance night will be mutually chosen and agreed to by class members and UUCF staff. If you like The Moth or StoryCorps, you will love this!

Every Saturday March 7 through April 4

18 years and older are welcome to participate.

Juliet Hutchings has been telling and teaching live true stories since 2010. Trained by the good folks at Story District in Washington, DC, Juliet took those skills to Rwanda and taught live storytelling in Kigali and then in Cape Town, South Africa. She looks very forward to helping guide you on your storytelling journey!

Like Writing for Chocolate (88)

The stories of our lives are our legacy. This writing evening is an opportunity to put on paper (or electronics) one simple story from your history. Whether you write for your children, grandchildren, other family members or good friends, this is a perfect time to share some of who you are. No prior writing experience is needed - you are fully capable of telling your story in your own words. Your voice and character will shine through. We will begin by looking over documents of important historic (within our lifetimes) dates to jog our memories and stimulate conversations. We will write for one hour, then enjoy coffee and assorted chocolate desserts. We will conclude by sharing what we have written with the group. This is totally optional. Confidentiality will be respected. If you have a chance to talk to someone who has come in the past two years, I'm sure they will say that this was a moving and inspiring experience.

Build a Pollinator Garden (94)

Climate change and the enormous rise in environmental toxicity, due to primarily to widespread use of pesticides, has caused sharp declines in bees, butterflies, and other pollinators as well as birds. Learn how you can help make a difference by creating a pollinator and wildlife habitat in your garden, backyard or balcony. It is simple, provide the essentials; food, shelter, and water in an eco friendly landscape. I will help you plan a pollinator garden, including planting layouts, and help you with sourcing native pollinator plants, including cuttings or divisions from my pollinator garden (note: I cannot help you with the actual construction or planting of your garden!). Includes a 16 plug flat of season-spanning pollinator plants from Prairie Nursery (a \$79 value), and a copy of the book Pollinator Friendly Gardening: Gardening for Bees, Butterflies, and Other Pollinators by Rhonda Fleming Hayes (\$17 value).

Naturopathic doctors are educated and trained in accredited naturopathic medical colleges. They diagnose, prevent, and treat acute and chronic illness to restore and establish optimal health by supporting the person's inherent self-healing process. Rather than just suppressing symptoms, naturopathic physicians work to identify underlying causes of illness, and develop personalized treatment plans to address them. They identify the natural order in which all therapies should be applied to provide the greatest benefit with the least potential for damage.

Glass in the Torch: make some beads! (268)

Shaping glass in a torch flame is called Lampwork. At Mary's studio in Woodsboro, she will guide you through making basic beads by winding softened glass onto wire mandrels, and decorating them- all at 1200-1400°! You are bidding for one 2-3 hour session, scheduled at our mutual convenience. Two spots are available (can do the class for 2 at once), bid is per person. This activity requires good focus, ability to stand for a couple hours, good vision, good fine motor control, and patience. You will make 6-8 beads. (They must cool slowly before you take them home, so they will be delivered to you sometime after the class. The hardest part is waiting for them to cool!) Mary has been doing lampwork for about 25 years. Examples of her work appear in Making Glass Beads by Cindy Jenkins 1996, and More Than You Ever Wanted To Know About Glass Beadmaking by James Kervin 1999. Glass beads from ancient Rome are known. The beads you make will outlive you! If you wear glasses - Bring them!

Unique: Penny whistle, book/cd tutorial, and live private lesson (187)

Love Irish music? Ever wished you could play it. Well, you CAN.

The Penny Whistle is a simple 6 hole flute on which is very easy to learn the basics, but you can refine and improve your playing for a lifetime. Being able to play at live, local sessions is within reach and is a great joy.

You'll learn from the superb Traditional Penny Whistle Handbook by legendary player and teacher Bill Ochs. The book includes a CD which lets you hear what each of the lessons should sound like. The lessons start by assuming that you know nothing about music and progresses very gradually. Anyone of any age can learn to make music.

Included in the auction is also a traditional, quality whistle right from Ireland.

Finally, I will give the winner of this auction a private lesson to help him or her get started. I've been playing whistle for over 30 years and I love getting people started playing, especially those who say "I could never learn to play an instrument"!

Give this a try-- you won't regret it!

3-D castle puzzle (241)

This is literally a whole (small) castle inside a box. It has been put together previously and - mostly - dismantled; i.e., many sections of the castle are still joined together, so purists probably will want to go through and un-attach all the pieces before building it again. (Sorry.) Material is sort of a cushy styrofoam backing on paper, so the pieces do have definite thickness to them. As far as is known, all 1500-something pieces are included.
